

PS Curve Converter 0.1

This script converts Photoshop Curves presets to PSP 8 Curves presets. It is limited to the first four channels stored in the PS preset and requires that these correspond to RGB, Red, Green, and Blue.

Installation information:

[Download the script.](#) Place the script in your Scripts-Trusted folder (required for UI and file I/O).

To Run:

Select PS Curve Converter in the list of scripts and press Play. Select the From and To directories and press Convert. The Script Output window will list the curves presets converted.
